Integrated financial management and reports

INTEGRATED TRAVEL MANAGEMENT

HOW IT WORKS

PowerSuite combines ticket issuance, invoicing, ticket inventory, exchange orders and financial processes into one unified workflow, so you eliminate redundant data re-entries, reduces costly errors and improve productivities. More importantly, it frees up time to concentrate on servicing your customers, increasing sales and boosting your bottom line.

FULLY INTEGRATED

PowerSuite has complete point-of-sale integration with Sabre Red Workspace. It delivers a simplified booking process that uses a central data source of customer information for PNR creation, booking, processing, ticketing, invoicing and reporting

There's a web-based module for online booking, tour distribution and sales, issuing documents and managing profiles to simplify remote access for your branches, implants and mobile teams.

And, you can integrate and automate bookings from your own online booking tools, using a comprehensive library of web services.

HOW WILL YOU STAND OUT

CUSTOMER MANAGEMENT

Flexible profile management supports passenger preferences and policy requirements, so you can guarantee consistent service to your customers.

And because there's a single source of data - from booking to invoicing to data extraction - you can be assured of data integrity to meet your customer pre- and post-trip reporting requirement.

MAKE THE RIGHT DECISIONS, QUICKLY

PowerSuite gives you instant access to real-time information with Accounts Receivable and Accounts

Payable details as well as over 400 standard reports, and you can go on to customise your very own reports with the new Reporting Tool configurator, complemented by a management dashboard. So you can act on new business opportunities as they arise.

AUTOMATED FINANCIAL MANAGEMENT

PowerSuite allows no-touch booking handling by creating sales folders and invoices, generates reports and dispatch the statement of accounts – all done automatically! Furthermore, with automated internal processes including calculating service, transaction and management fees and commission, PowerSuite enables you to speed up financial closures and guarantee reporting accuracy.

SALES FOLDERS, INVOICING AND ACCOUNTS RECEIVABLE

POWERSUITE SIMPLIFIES YOUR SALES AND FINANCIAL PROCESSES. THE SOLUTION IS SO POWERFUL BECAUSE IT:

- Integrates PNR and ticket information for all air and ancillary products and services; including comprehensive handling on EMDs and fares taxation.

- Automates internal processes, including calculating service, transaction and management fees and commissions.

- Allows no-touch booking handling by automatically creating sales folders and even invoices, generating reports and dispatching the statements of accounts.

- Enables scheduled generation and delivery of reports to speed up booking to cash collection processes.

- Makes it easy to meet corporate data needs with a wide range of extraction tools for the credit cards transactions, airlines bookings and trip reporting associated with corporate travels.

- Gives you tight control over credit standing, receivables and customer analysis.

OPERATIONAL AND FINANCIAL REPORTING

With more than 400 standard real-time reports, a custom reporting tool configurator and a comprehensive management dashboard, you'll be able to keep up with all aspects of your business, so you can maximise your performance and make the most of new market opportunities.

MANAGEMENT DASHBOARD
